DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-21 & 35-36, drawn to an arrangement for selecting and evaluating an image, classified in class 385, subclass 286.

II. Claims 22-24, drawn to an image compression arrangement, classified in class 382, subclass 232.

III. Claims 25-34, drawn to an image pickup control system, classified in class 358, subclass 468.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the evaluation device may be implemented for evaluation of images

with parameters other than compression. The subcombination has separate utility such as compression of a single image.

4. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as evaluation of images produced without the use of a device with an acceptability selection mode and a continuous shooting mode. See MPEP § 806.05(d).

5. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as compression of images produced without the use of a device with an acceptability selection mode and a continuous shooting mode. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be

Art Unit: 2624

examined even though the requirement be traversed (37 CFR 1.143).
